ADVERTISEMENTS.

ADVERTISEMENTS.

TO BOOKSELLERS, &c.—WANTED, by a respectable young man, a SITUATION as ASSISTANT. He has had 10 years' experience in the trade, is thoroughly conversant with the bookselling and stationery departments, and can have a six years' unexceptionable recommendation from the employer he is about leaving.
Address to R. S. 16, Prince's-row, Pimlico.

TO PRINTERS and BOOKBINDERS.—WANTED immediately, in the country, where permanent employment will be given, a person to take the management of a small Jobbing Office, and who perfectly understands both Case and Press, and the general routine of a Printing-office. If he has a knowledge of Bookbinding, he will be preferred.
Also, a BOOKBINDER, who can forward and finish well, marble and gild edges, and who understands the general business of a country Binding-office.
Testimonials of steadiness and ability will be required.
Apply at 92, Leadenhall-sreet.

TO PRINTERS.—A COMPOSITOR, who thoroughly understands his business and is capable of reading proofs, is anxious to obtain a PERMANENT SITUATION.
Address to F. G. 20, Edward-street, Regent-street, City-road.

To Architects, Engineers, Contractors, Builders, Masons, and Plasterers, Merchants, Shippers, and the public in general.

JOHNS and CO.'S PATENT STUCCO CEMENT. —The following are the positive advantages possessed by this invention over every cement hitherto introduced:—It will effectually resist Damp. It will never vegetate nor turn green, nor otherwise discolour. It will never crack, blister, nor peel off. It will form a complete Stone casing to any building covered with it. It so closely resembles stone that it is impossible to detect it. In never requires either to be painted or coloured. It will keep fresh and good in the cask in any climate for any number of years. It is the only cement that can be depended upon for export. It is the only cement that can be used with confidence by the sea-side. It may be used in the hottest or coldest climates at any season. It will adhere to any substance, even to wood, iron, or glass. It will carry a larger proportion of sand than any other cement. It matures by age, and becomes perfect when other cements begin to perish. It may be worked through the winter, as frost has no effect upon it. It may be used on the inner walls of new houses, which may be papered over or painted directly. Roofs laid or pointed with this cement will remain undamaged by the severest storms. Any plasterer may apply it, the instructions for use being very clear and distinct. The first cost of this material does not exceed that of the cheapest cement now in use; but with all the above-named extraordinary and valuable advantages, nothing can approach it in point of economy.
Architects and Builders who have used this Cement have declared that it requires only to be known, to be universally preferred.
Specimens may be seen, and a Prospectus fully describing the Cement and its mode of application, together with a volume of Testimonials from every part of the Kingdom, may be obtained on application to MANN and CO., Sole Agents for the Patentees, 5, Maiden-lane, Queen-street, Cheapside, London; of whom also may be had
JOHNS and CO.'S PATENT STONE-COLOUR STUCCO PAINT, expressly intended for painting over exterior walls of houses that have been covered with Roman or other cements, and which have become dirty and discoloured. It is in every way better suited for this purpose than white lead paint, which will frequently come off in flakes, being in direct chemical opposition with cement: whereas Messrs. JOHNS and CO.'S PATENT PAINT having an affinity for stucco, binds itself with it, stopping the suction, thereby rendering the wall proof against weather, and in the finish producing a pure stone-like effect, produceable by no other paint whatever. It is cheap in its application,—and may be used by any painter, in any climate, even in the most exposed marine situations.

(*To be continued.*)

Since the 14th of December last,

THE COLERAINE CHRONICLE has been enlarged to Twenty-eight columns, without any addition to its price and is now one of the largest and cheapest newspapers in Ulster.

Conservative in politics, and Protestant in principle—yet moderate in tone, and charitable to the errors of others—avoiding the slang of party, which taints what it touches, and injures the cause it would serve—the *Chronicle* will ever advocate those principles of Constitutional freedom and Christian truth, which have placed the empire of Great Britain first among the nations of the earth.

In Literature as in Politics—in relation to Commerce as to Agriculture, its Original Articles will be found consistent with its principles, while those taken from other sources will be not only selected, but select.

The only newspaper published within the district extending from Belfast to Lough Foyle, and from Armagh to the sea;—a district the most prosperous and thickly peopled of any in Ireland, containing nearly 3,000 statute miles, and comprising over 50 market, post, or fair towns; and enjoying besides, a large circulation beyond these limits—not only in Ireland, but among Irish residents in London, Leeds, Liverpool, Glasgow, Greenock, Paisley, and other parts of England and Scotland; it is unnecessary to say the *Chronicle* affords an eligible channel for advertisements requiring either local or general publicity.

Published in Coleraine every Saturday morning.

Terms:—Yearly subscription, in advance, 17s.; on credit, 18s.; Half-yearly, in advance, 8s. 6d.; on credit, 9s.; Quarterly, in advance, 4s. 3d.; on credit, 4s. 6d.

Just Published, in one large 8vo. volume, price 16s. cloth, with engraved specimens from early Irish Manuscripts,

A GRAMMAR of the IRISH LANGUAGE, published for the use of the Senior Classes of the College of St. Columba.

By JOHN O'DONOVAN.

The work is preceded by an introductory chapter on the origin of letters and writing in Ireland, and interspersed with copious examples from the remains of the ancient language still preserved in manuscript—not only as a source of information concerning inflexions and forms of the language, but also because it has hitherto been almost entirely neglected.

CALIGRAPHIC BLACK LEAD PENCIL,

MANUFACTURED BY E. WOLFF AND SON,

No. 23, CHURCH-STREET, SPITALFIELDS, LONDON.

The Caligraphic Pencils have been invented by E. Wolff and Son, after the expenditure of much time and labour. They are the result of many experiments, and every effort that ingenuity and experience could suggest has been made to insure the highest degree of excellence, and the profession may rely upon their being all that can be desired.

They are perfectly free from grit; and for richness of tone, depth of colour, delicacy of tint, and evenness of texture, they are not to be equalled by the best Cumberland lead that can be obtained at the present time, and are infinitely superior to every other description of Pencil now in use.

The Caligraphic Pencils will also recommend themselves to all who use the Black Lead Pencil as an instrument of professional importance or recreation, by their being little more than half the price of other Pencils:—

H, HH, HHH, HB, B, BB, F, FF, W* ..... 4s. per dozen.
BBB, EHB ..... 8s. „
BBBB ..... 12s. „

* This Pencil is particularly recommended for writing and counting-house use.

An allowance on every gross purchased by artists or teachers. May be had of all artists' colourmen, stationers, booksellers, &c.

A single Pencil will be forwarded as a sample, upon the receipt of postage stamps to the amount.

CAUTION.—To prevent imposition, a highly-finished and embossed protection wrapper, difficult of imitation, is put round each dozen of Pencils. Each Pencil will be stamped on both sides, "Caligraphic Black Lead, E. Wolff & Son, London."

*** The usual trade allowance to stationers, booksellers, &c.

A show-box or specimen gratis with an order for a gross of Pencils.
